

Exercise

Members only

Throughout the course so far, you've been exposed to some common problems that you may encounter with your data, from data type constraints, data range constraints, uniqueness constraints, and now membership constraints for categorical values.

In this exercise, you will map hypothetical problems to their respective categories.

Instructions

100XP

- Map the data problem observed with the correct type of data problem.

 **Take Hint (-30 XP)**

Incorrect

One can either have a loan or not have a loan.

Membership Constraint

A `month` column with the value `14` .

A GPA column containing a Z- grade.

A `day_of_week` column with the value `Suntermonday` .

A `has_loan` column with the value `12` .

Other Constraint

A `revenue` column represented as a string.

A `birthdate` column with values in the future.

An age column with values above 130 .
